	What I can do in this unit	Level
3-1	I can convert powers between exponential form, expanded form, and standard form and evaluate using integer, fractions, and decimal bases.	
3-2	I can use the exponent laws for products and quotients. (add exponents for products of same bases, subtract for quotients).	
3-3	I can use the power of a power exponent law and apply it to coefficients and variables. (multiply exponents when taking the power of a power)	
3-4	I can convert a negative power to a positive power and evaluate a zero power with integer and fraction bases.	

Code	Value	Description
N	Not Yet Meeting Expectations	I just don't get it.
MM	Minimally Meeting Expectations	Barely got it, I need some prompting to help solve the question.
М	Meeting Expectations	Got it, I understand the concept without help or prompting.
E	Exceeding Expectations	Wow, nailed it! I can use this concept to solve problems I may have not seen in practice. I also get little details that may not be directly related to this target correct.

3-1: I can convert powers between exponential form, expanded form, and standard form and evaluate using integer, fractions, and decimal bases.

2)	-3 ⁴	-3.3.3.3	-81
3)	$(-2)^5$	(-2)(-2)(-2)(-2)(-2)	-32
4)	x ⁶	XXXXXX	Cannot

Write each of the following in exponential form in as many ways as indicated. Do not use a power of 1.
